

URINARY BLADDER NEOPLASM: TRANSURETHRAL RESECTION (TURBT)

Specimen Part(s) Involved: _____

Histologic Tumor Type: Noninvasive papillary urothelial carcinoma
 Noninvasive flat urothelial carcinoma
 Invasive papillary urothelial carcinoma
 Invasive urothelial carcinoma
 Squamous cell carcinoma
 Adenocarcinoma
 Small cell carcinoma
 Other: _____

Non-urothelial Differentiation: Present Absent N/A

Modified ISUP/WHO Grade: Low-grade
 High grade
 Other: _____

Stromal (Lamina Propria) Invasion: No stroma present
 Stroma present; no evidence of invasion
 Stroma present, suspicious or indeterminate for invasion
 Stroma present with evidence of invasion

Muscularis Mucosa Invasion*: Yes No Indeterminate

**For stromal (lamina propria) invasion only*

Muscularis Propria Invasion: No muscularis propria present
 Muscularis propria present; no evidence of invasion
 Muscularis propria present, suspicious or indeterminate for invasion
 Muscularis propria present with evidence of invasion

Lymphovascular Invasion: Present Absent N/A

Carcinoma In Situ (CIS) Adjacent to Tumor: Present Absent N/A
