

Postdoctoral Fellow  
Mary H. Weiser Food Allergy Center and  
Department of Pathology

**Brief Description:**

Postdoctoral research positions are available in the immunology laboratory of Dr. Chang H. Kim ([chhkim@umich.edu](mailto:chhkim@umich.edu)) at the University of Michigan within the Department of Pathology and Mary H. Weiser Food Allergy Center. Successful candidates will become part of a highly productive and collaborative team of researchers in a modern, interconnected laboratory space. Within the group, there is a strong commitment to mentorship and an excellent track record of success for both academic and industrial career tracks. Please visit the Kim lab website for more information: (<https://www.pathology.med.umich.edu/chang-kim-lab>).

**Job Responsibilities:**

PhD level research activities including literature search, critical thinking, designing and carrying out in vitro and in vivo experiments and writing papers. Successful candidates will have opportunities to write fellowship/career development grants.

Research projects are available in the following areas:

- Mucosal immunology (effector and regulatory T cell subsets and B cells)
- Development and migration of innate immune cells and lymphocytes
- Roles of vitamin A and retinoic acid in the immune system
- Roles of gut microbial metabolites in the immune system

Interested individuals should send a cover letter and CV to:
